Safe hands!!

Limits to use

The maximum duration of exposure at ultra cold temperatures is dependent on many variables, including atmospheric conditions, the task being performed and the users physiology. The thermal flux transmitted through the glove is sufficiently low to allow the user adequate time to safely remove themselves from the hazard

Instructions for storage:

Store in an area free of contamination. Do not leave your hearing protection device in areas or locations where it can be exposed to damage or contamination. Sunlight is particularly damaging as UV light can have a detrimental effect on the materials the product is made from.

Ear Defender

Maintenance/Cleaning

Hearing protectors should be inspected prior to use for damage or deterioration. Damaged or worn parts should be replaced prior to use. The noise reduction will only be obtained if the earmuffs are in good order and worn as directed. Regular cleaning using warm water and soap. Components should be dried prior to use. Mild detergent and hygiene wipes can be used on this product

European Directives – 89/686/EEC
EC Category PPE – Category II
Standards – EN 352-1:2002
SNR 27 db

Instruction For Use

Construction, Mechanical maintenance, Aeronautical application, mining, engineering, Industrial work etc
