INTRODUCING AN INDUSTRY FIRST: LASER ON CLOTHING

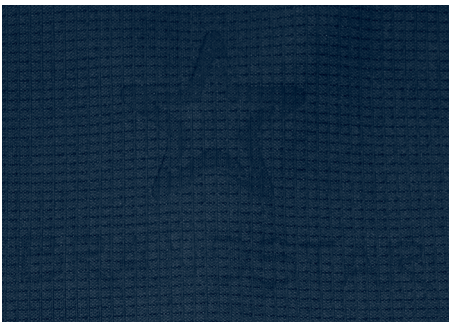

For a subtle, tone-on-tone look that projects a sophisticated image, choose laser for your branding option.

Laser is the only branding method that can be applied over zippers and seams, is resistant to fading and won't compromise the integrity of waterproof garments.

As depicted below, the result and clarity of laser may vary depending on the colour, style and material of the garment.

To illustrate the variance, we branded the same logo on 7 different colours of the same garment.

Given the less-than-desirable outcome (as seen on the swatch to the left) we do not offer laser etching on black, navy or white garments.

Laser-ready styes in the catalogue are denoted by  at the top of the applicable page. Where a model is wearing a laser-ready colour of a laser-ready style, we have included a swatch depicting the lasered logo.

Kindly look through the **LASER SWATCH GUIDE ON THE FOLLOWING PAGES**, indicating laser-ready colours and styles and showing the results of laser etching on the various colours and styles.

COMBINATION BRANDING

With our multi-method-multi-position branding capabilities and your creativity,
our range provides the platform for you to have some fun with your logo:

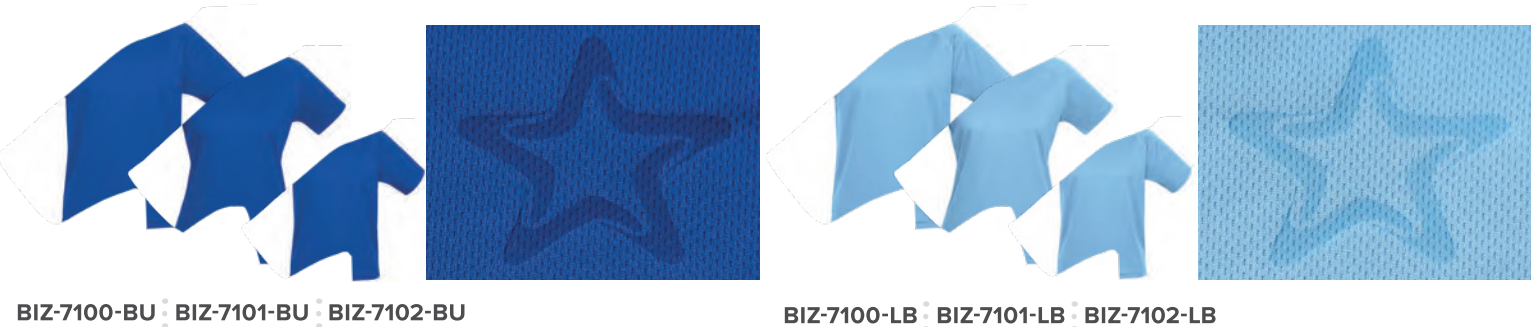

it's **YOUR BRAND**, do it **YOUR WAY**.

LASER ON CLOTHING SWATCH GUIDE

Refer to the swatches below for laser-ready colours and styles. The swatches are intended to provide a reasonably accurate indication of how the results of laser will vary from colour to colour and style to style, but due to the inherent limitations of photography and printing, we recommend requesting a sample to be certain.
