LISTENERS APPRECIATE

a lack of distortion

PAUL W. KLIPSCH - FOUNDER

Over 70 years ago

SOMETHING VERY SPECIAL OCCURRED IN A TINY TIN SHED IN HOPE, ARKANSAS

In 1946 Paul W. Klipsch (PWK) - genius, madman and maverick - designed and hand-built the legendary Klipschorn® loudspeaker with the goal of bringing live music into his living room. He was an American audio pioneer and a true eccentric. PWK gave rise to speaker research and invention that would forever impact generations of music lovers.

Today, in this honored tradition, we move forward, pushing the boundaries of art and science - while driving new technologies - to deliver an ever-incredible listening experience. Remember great sound? We never forgot.

We are the Keepers of the Sound®

TRACTRIX® HORN TECHNOLOGY

Exclusive Klipsch 90°x90° Tractrix horn technology ensures the best clarity, dynamics, and detail from movies and music.

LINEAR TRAVEL SUSPENSION TWEETER WITH KAPTON® SUSPENSION

Proprietary Klipsch Linear Travel Suspension aluminum tweeter minimizes distortion for enhanced, detailed performances. Kapton, an extremely light and rigid material, provides high efficiency and improved resolution.

SPUN-COPPER INJECTION MOLDED GRAPHITE WOOFERS

Injection Molded Graphite (IMG) woofer cones are exceptionally light yet extremely rigid, delivering deep, clean bass with minimal distortion.

REAR TRACTRIX PORT

The rear Tractrix port is perfectly matched to the cabinet and woofers, creating ideal airflow at the lowest frequencies.

MODERN ELEGANCE

Exposed fasteners, low profile magnetic grilles and a scratch-resistant wood grain vinyl give the Reference series a polished, modern appearance.

HIGH-QUALITY CABINET DESIGN

Reinforced medium density fiberboard (MDF) construction reduces cabinet vibration and improved sonic accuracy for the ultimate listening experience that's built to last.

REFERENCE

SOUND COMES
to life

Klipsch proprietary speaker technologies are ideal for delivering the most immersive, impactful 360° Dolby Atmos listening experience where sound comes alive from all directions, including overhead, to fill a home theater with astonishing clarity, power, detail and depth.

Choose from speakers with an integrated elevation channel or add an elevation speaker to the top of any existing floorstanding or monitor speaker.

 Bluetooth®

NO RECEIVER NEEDED

Klipsch powered monitors are powerful, small form-factor music monsters packed with Klipsch acoustics, integrated power and Bluetooth® wireless technology. They connect to virtually anything, making them the best performing, most versatile monitors on the planet.

A Dynamic Bass EQ feature increases volume at low frequencies to match the human ear's ability to perceive bass.

Add any Klipsch subwoofer for a full-fledged 2.1 stereo sound system that will bully any sound bar.

Klipsch Reference subwoofers are designed to deliver awe-inspiring bass to movies and music. All-digital amplifiers power a front-firing, spun-copper IMG woofer producing clean, deep bass for any home audio system.

Line level/LFE RCA inputs maximize compatibility with receivers, while reinforced MDF minimizes cabinet vibration for the ultimate listening experience that's built to last.

DESIGNED WITH PRIDE IN INDIANAPOLIS

WE NEVER, *ever* STOP INNOVATING

For over 70 years Klipsch has designed and engineered its products in-house with some of the most talented, skilled and passionate people in the industry - starting with our founder, Paul W. Klipsch (PWK), in a tin shed in Hope, Arkansas.

Today, our advanced acoustic research and development continues at our state-of-the-art facility in Indianapolis, Indiana. The world-class Klipsch Design & Technology Center is home to some of the most brilliant minds in consumer electronics and some of the most legendary products the industry has ever heard. We continue to innovate, honoring the principals and ideals of PWK, reaching ever-farther towards that perfect sound.
