

# Stretcher - Plastic Spinal board

Product Code: STR.PS.YSC-J02

This plastic spine board can be used as a floatation device. It has a tapered end that ensures proper placement in helicopters and basket stretchers. The board is completely x-ray translucent so the patient can stay in place during x-rays. It is made of one piece which means that there are no seams or joins so body fluids or water cannot impact on the board. It is compatible with most head immobilisation devices and strap mechanisms.

## Features:

- Manufactured from HDPE
- Non-slip mild grain surface
- 19 large handles for easy lifting
- Angled edges for easy log rolling
- Load bearing: 159kg

## Dimensions:

- 185 x 45 x 6cm
- 7kg
